

▼ **INGREDIENTS**

SUPPLEMENT FACTS	
Serving Size: 2 capsules	
Amount Per Serving	% Daily Value
Vit A (Retinol Acetate).....	1000 IU 20%
Vit C (Ascorbate).....	200 mg 333%
Vitamin E Complex.....	100 IU 333%
Zinc (Chelate).....	20 mg 133%
Copper (Chelate).....	2 mg 100%
Proprietary Blend.....	1850 mg
*Taurine, Resveratrol, Curcumin, Bilberry, N-Acetyl Cysteine, L-Carnitine, Inositol Hexaphosphate, Alpha Lipoic Acid, Rosmarinic Acid, Quercetin, Goji Berry, Maqui Berry, Green Tea Extract (EGCG), Lycopene, Ginkgo Biloba (EGC), Zeaxanthin (1.5 mg), Lutein (1 mg), Astaxanthin (1 mg)	
*Daily value not established.	
Other Ingredients: Cellulose, Lecithin and Vegetable Stearate	

▼ **DOSAGE**

- 1-3 capsules, twice per day, or as directed.

▼ **PACKAGING**

- Capsules: 60 capsules/eco-bottle

▼ **PERSPECTIVE**

The modern-day environment and normal immune system function can gang up to ruin a person's eyesight. Today's work and lifestyles take a toll on nerve processes. Blue light from computer and cell phones, toxins in the environment, aging processes, and the immune system's inflammation processes can all add up to oxidative stress for the macula, optic nerve, and brain. Genetically, some people are more susceptible than others.

- The protein-coding faculties of the ARMS2 (Age-Related Maculopathy Susceptibility 2) gene, and its risk alleles; plus
- CFH (Complement Factor H), an immune system gene, and its risk alleles, point directly to the free radical damage processes of Age Related Macular Degeneration (AMD), a common cause of vision loss in the aging population. Fortunately, research also points to actionable herbs and nutrients that can best support the eyes, optic nerve, and brain. This research forms the basis of this state-of-the-art formula.

▼ **LIFESTYLE**

**#855 NEUROVISION (Eye & Immune Health)**

With a keen insight to both eye and immune function, plus insights about the brain's nutritional requirements, this formula applies the latest scientific research with actionable nutrients including curcumin, anthocyanosides, green tea, astaxanthin, and resveratrol. These provide key cellular factors that naturally help protect, even repair, the daily wear-and-tear to the eyes and brain. When put together, they form the world's most powerful antioxidant array to help the body's normal cellular activities, including its natural inflammation-reducing processes. Neurovision provides and employs neuroprotective measures for a lifetime of good vision and cognition. Neurovision is designed to assist the body in protecting itself from neurodegeneration and neuroinflammation. Most supplements for AMD really only work for one of the two genotypes. For example, people with ARMS2 will need extra nutrients such as zinc for proper neuroprotection. With a CFH risk factor, supplemental tyrosine and antioxidants are proven to be actionable. Neurovision is the first product designed for people with both major genotypes associated with Age Related Macular Degeneration (AMD).

▼ **INDICATIONS**

- Eyes – healthy function and maintenance
- Macular health
- Enliven brain function
- Supports neuro pathways throughout the body
- Diabetics/Metabolic Syndrome

▼ **KEY COMPONENTS**

- **Astaxanthin** – Research demonstrates this antioxidant is applicable for age-related macular degeneration, dry eyes, eye fatigue, double vision, retinal capillary blood flow, glaucoma, diabetic retinopathy, cataracts, and brain health.
- **Zinc** – A leading eye-supportive trace mineral. Works in synergy with Vitamin C and flavonoids including lutein and zeaxanthin.
- **Bilberry** – The leading, time-honored food for sharp vision, rich in anthocyanins and polyphenols. Research cites support to avoid glaucoma, dry eyes, cataracts, and macular degeneration. Especially important in the computer/cell phone age.
- **Resveratrol** – Helps protect the tiny blood vessels that nourish the eyes. Famous for decelerating the aging process. Studies involving diabetic retinopathy demonstrate it helps prevent excessive angiogenesis processes that can damage vision acuity.
- **Curcumin** – The most studied compound from the turmeric rhizome. Scientifically cited for its positive impact on inflammatory processes.
- **Rosmarinic Acid** – Scientific research found this botanical molecule restores complete transparency of sonicated human cataract and helps delay cataract formation.
- **EGCG** – The Epigallocatechin Gallate molecule from green tea is famous for attenuating free radical damage via epigenetic influences.
- **Lutein/Lycopene** – Carotenoids from plants and powerful antioxidants. A specific for blue light damage to the lens and retina.
- **Quercetin** – A flavonoid and ionophore for zinc induction through the cell membranes. Serves immunoregulatory functions with specific applications for the retinal health.
- **Taurine** – An amino acid found in high concentrations in the eye's retina (a component of the eyes' rods and cones necessary for vision). Specifically cited to support macular and retinal health functions. Helps repair damaged cells via normal cellular metabolic activities.

▼ **CONTRAINDICATIONS**

None when taken as directed.

▼ **CLINICIAN CONSENSUS**

**Support For Optimal Visual/Macular Health**

- **#855 Neurovision** (Eye & Immune Health)
- **#854 Neurosyn** (Neuro-Cognitive Memory Support)
- **#50 I** (Eyes)
- **#845 Homocysteine-TLR** (Thiolactone Redux Support)

▼ **BACKGROUND**

Based on recent, published scientific studies, Dr. Shayne Morris, a nutria-metabolomic expert, and his team including Drs. Christy Sutton and Jack Tips, applied nutrition and genetic research toward helping the body enhance its innate eye and vision protective cellular functions. Coupled with Herbalomic™ research that demonstrates efficacious botanical influence over cellular epigenetic responses, Dr. Morris combined natural nutrients, nutraceutical/metabolic ingredients, and herbal "activation" factors into a synergistic blend of targeted nutrition.

▼ **SYNERGISTIC CONSIDERATIONS**

- **#854 Neurosyn** (Neuro Cognitive Memory Support)
- **#875 Synulin** (Glycemic Balance)
- **#845 Homocysteine-TLR** (Thiolactone Redux Support)
- **#850 Mors** (Methylation Donor)
- **#50 I** (Eyes)
- **#184 ROX** (Super Antioxidant w/Resveratrol)
- **#433 GCEL** (Intracellular Glutathione)
- **#820 Epic** (Metabolic NO-ONOO Micro Antioxidant)
- **#12 B** (Brain)
- **#195 ZNC** (Zinc)
- **#101 ACP** (Vitamin ACP)
