## MITOATP

### MITOCHONDRIA SUPPORT FOR ATP PRODUCTION

**MitoATP** is the answer to supercharge your energy at the cellular level.

Specifically chosen extracts of fulvic acid, combined with polyelectrolytes support your mitochondria to maximize *adenosine triphosphate* (ATP) production. Classified as “the molecular unit of currency,” ATP is a necessity for a variety of cellular processes, including muscle function, neuro-transmission, activation of amino acids in protein synthesis, and intracel-lular energy transfer.

Toxins, infections, heavy metals, and aging slow down your mitochondria and hamper their ability to generate the energy you need for everyday cellular function as well as detoxing and healing efforts. **Mitochondria can not only slow down, but die off, leaving you with less of these power producing plants in your cells.** During these slow-down periods, chronic illness and disease may become painfully evident, as your cells lose their ability to fully “charge.”

Your mitochondria require precise levels of minerals and electrons for peak performance. They also leverage polysaccharides which assist in signaling molecules. Without these components, they are missing vital keys to complete the energy cycle, which also inhibits their ability to assist in detoxification and DNA synthesis and repair. The **oxidative stress within your cells increases with this back-up of toxins.**

MitoATP from CellCore Biosciences has the specific minerals, electrons, and polysaccharides these power generators need to not only **support energy creation, but enhance your immune response and help protect DNA from long-term damage.** These carbon-based polyelectrolytes help recharge depleted mineral and electron concentrations to restore the ATP process to peak efficiency.

Another result of the energy cycle, is the production of pure water. Sup-porting mitochondrial function will **boost your cellular hydration,** aiding in effective detoxification.

MitoATP assists the body in getting back to optimal wellness by support-ing the power plants behind all your bodily processes: *your mitochondria.*

### Ingredients

**Proprietary blend** (99% Fulvic Acid) Polyelectrolyte extracts of Fulvic, polysaccharides extracts of Fulvic, Bibasic acid of Fulvic.

**Other ingredients:** Ionic (cell-ready) macro-, micro-, and nano-sized polyelectrolytes to include trace minerals and other organic and carbon compounds: Ulmic, Acetic, Gallic, Caffeic, Benzoic, Cinnamic, Shikimic, Fumaric, Protocatechuic, Phenylacetic, Ferulic, Lactic, Malic, Succinic.

### Dosage

Use up to 10 drops twice daily or as directed by your qualified healthcare practitioner. Not intended for use by persons under the age of 18. Do not use if pregnant or nursing. Consult your healthcare practitioner if you are taking prescription medication or have an existing medical condition.

Rev. 5/2019
